Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The objection to claims 43-51 and 52-54 has been withdrawn.

Claim Rejections - 35 USC § 112

3. The 112 second paragraph rejection of claims 47-54 has been withdrawn.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2637

5. Claims 43-48, 50 and 51 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3-7, 9 and 10 of U.S. Patent No. 6,363,129. Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention as claimed in claim 43 of the pending application is fully encompassed the claim 4 of the patent except for the fact that the claim of the patent does not recite receiving a plurality of transmitted signals and generated that phase control signals associated with each transmitted signals. However, it would have been obvious to one skill in the art to configure applicant's claimed invention in such a way as to receive transmitted signals and to generate phase control signals for each of said transmitted signals so as to process signals from external sources such as remote transmitting stations.

Claim 44 and claim 45 are encompassed by claim 3, respectively.

Claim 46 is encompassed by claim 5.

Claim 47 is encompassed by claim 6.

Claim 48 is encompassed by claim 7.

Claim 50 is encompassed by claim 9.

Claim 51 is encompassed by claim 10. the same comment applies to claim 43 applies to each of claims 44-48, 50 and 51.

Allowable Subject Matter

6. Claims 52-54 are allowed.
